Dhruv Mishra

Address: House No.J-65, Block J, Dilshad Colony, Delhi, India
Socials: [LinkedIn](), [GitHub]()

EDUCATION

Bachelor of Technology in Computer Science and Applied Mathematics,
IIIT-Delhi
Dec 2020 — Jun 2024
CGPA: 8.92 / 10.0

Senior Secondary Education in Science with Computer Science
Amity International School
Apr 2018 — Apr 2020
Percentage: 95%

SKILLS

Languages: C++, Python, Java, TypeScript, Javascript, C, Bash, HTML
Database: MySQL, MongoDB
Version Control: Git, ADO
Additional: Scipy, Tensorflow, GANs, TensorflowHub, Microsoft Power Automate, Microsoft Fluid Framework, Google Cloud Platform, Django, Docker, FASTAPI, Google Earth Engine, VMWare, JavaFx, Remote Sensing, REST API, Comp. Vision(OpenCV)
Technical Electives:
- Foundations of Computer Security
- Machine Learning (ML)
- Computer Networks (CN)
- Advanced Programming (OOPS)
- Database Management (DBMS)
- Operating Systems (OS)
- Analysis and Design of Algorithms

Skills: Software Systems, Software Engineering, Problem Solving, Information Retrieval, Troubleshoot, Software Design, Algorithm Design, Collaboration, Hardworking

PORs

- Student Senate Batch Representative
- Member of Organising Team at ESYA, Kohinoor, Farewell, etc.

WORK EXPERIENCE

Software Engineering | Microsoft
Jun 2024 - Current
- Raised the unit test coverage for a package from 5% to 60% using typescript and jest within the first week of joining Microsoft Loop

Software Engineering Intern | Microsoft
May 2023 - Jul 2023
- Developed and Tested a connection management service for Microsoft Loop by implementing core functionalities to synchronize connection status among multiple instances with the Jira Platform
- Integrated and Tested GitHub and Azure DevOps (ADO) REST APIs into the Microsoft Power Platform Connector, enabling automation and streamlined developer workflows.

Undergraduate Researcher | Distributed Computing and Learning Lab, IIITD
Aug 2023 - Current
- Working on a Lock-Free, Relaxed Concurrent Data Structure aimed at increasing write and read operations in multi-threaded settings in Counting Bloom Filters. We are working on reducing thread contention for speedup.
- The current implementation allows up to a 300% increase in throughput. The entire implementation is in C++, with the testing code using Python.

Software Engineering Intern | growIndigo
Feb 2024 - Jun 2024 | Apr 2022 - Jun 2022
- Automated the prediction of the crop type through Google Earth Engine, reducing the time taken in the process by 80%.
- Replicated the desired functionalities of Google Earth Engine for independently scaling through Python, implementing every necessary function and API. Reduced the overall time for a classification workflow increasing the accuracy of classification to 93%+ from the previous 80%.

Teaching Assistant | IIIT Delhi
Aug 2022 - Dec 2022
- Teaching Assistant for Introduction to Programming Course under the founding director of IIIT Delhi, Dr. Pankaj Jalote.

PROJECTS

[Course Similarity Evaluator]() | Prof. Dhruv Kumar
- A tool that helps students and teachers identify overlapping courses within the course directory to avoid redundant courses.

Property Listing Website: Security | Prof. Arun Balaji Buduru
- A property listing website with FASTAPI backend, HTML CSS Front End, and MongoDB database, focusing on security. Built for withstanding attacks in the course 'Foundations of Computer Security.'

[Instant Vital Checkup]()
- An OpenCV-based application with an intuitive UI to estimate a person's physical measurements and vitals through video.

[Banking System]() | Prof. Mukesh Mohania
- An E2E, multi-user banking system with database management, essential security features, and a user-friendly interface.

AWARDS AND ACHIEVEMENTS

- **[Codeforces Expert]()** (Peak Rating: 1703)
- **[Codechef 5* Rated Coder]()** (Peak Rating: 2003(Old Rating System))
- **Global Rank 167** in Reply Code Challenge
- Google Code Jam(2023) Round A **Global Rank #291**
- Google Kickstart(2022) Round-H **Global Rank #362**
